

Team Contributions: Rev 0

PCD: Partially Covered Detection of Obscured People using Point Cloud Data

Team #14, PCD
Tarnveer Takhtar
Matthew Bradbury
Harman Bassi
Kyen So

This document summarizes the contributions of each team member for the Rev 0 Demo. The time period of interest is the time between the POC demo and the Rev 0 demo.

1 Demo Plans

The plan is to demo human detection that is skin dependent and growing from there. More information on the demonstration plan can be found in the *Proof of Concept Demonstration Plan* section of the [Development Plan](#).

2 Team Meeting Attendance

Student	Meetings
Total	7
Tarnveer Takhtar	7
Matthew Bradbury	7
Harman Bassi	7
Kyen So	7

One meeting was for divvying up the MIS/MG documentation and the remaining meetings were to work on the application itself. The code meetings were mainly work sessions to test out and optimize code for a better algorithm.

3 Supervisor/Stakeholder Meeting Attendance

Student	Meetings
Total	1
Tarnveer Takhtar	1
Matthew Bradbury	1
Harman Bassi	1
Kyen So	1

There was one in person meeting with Dr.Bone. This was to show the current progress of the team after the POC demo and to discuss further methods to improve the current implementation.

4 Lecture Attendance

Student	Lectures
Total	2
Tarnveer Takhtar	2
Matthew Bradbury	2
Harman Bassi	2
Kyen So	2

5 TA Document Discussion Attendance

Student	Lectures
Total	1
Tarnveer Takhtar	1
Matthew Bradbury	1
Harman Bassi	1
Kyen So	1

6 Commits

Student	Commits	Percent
Total	76	100%
Tarnveer Takhtar	34	44.7%
Matthew Bradbury	16	21.1%
Harman Bassi	12	15.8%
Kyen So	14	18.4%

Commit numbers are based on the Insights/Contributors tab, contribution numbers do not include any co-authored commits (avoid double counting).

7 Issue Tracker

Student	Authored (O+C)	Assigned (C only)
Tarnveer Takhtar	2	10
Matthew Bradbury	23	12
Harman Bassi	0	8
Kyen So	0	8

8 CICD

We will be implementing CI/CD using a combination of Github Actions and Clang-Tidy linter throughout the development process of our software system. The action will be used for static code analysis, ensuring our code meets proper coding standards. The action will trigger against every commit and pull request, ensuring the code quality remains consistent throughout the development process.
